Introduction

1 Purpose

The purpose of this document is to provide a simple 'how-to' overview of the most commonly used functionality in the Cayman Islands AEOI Portal ("AEOI Portal") with respect to financial institutions meeting their reporting requirements.

This document is not intended to provide business or policy/regulatory guidance to financial institutions; it includes only instructional 'how-to' guidance on the use of the AEOI Portal.

2 Scope

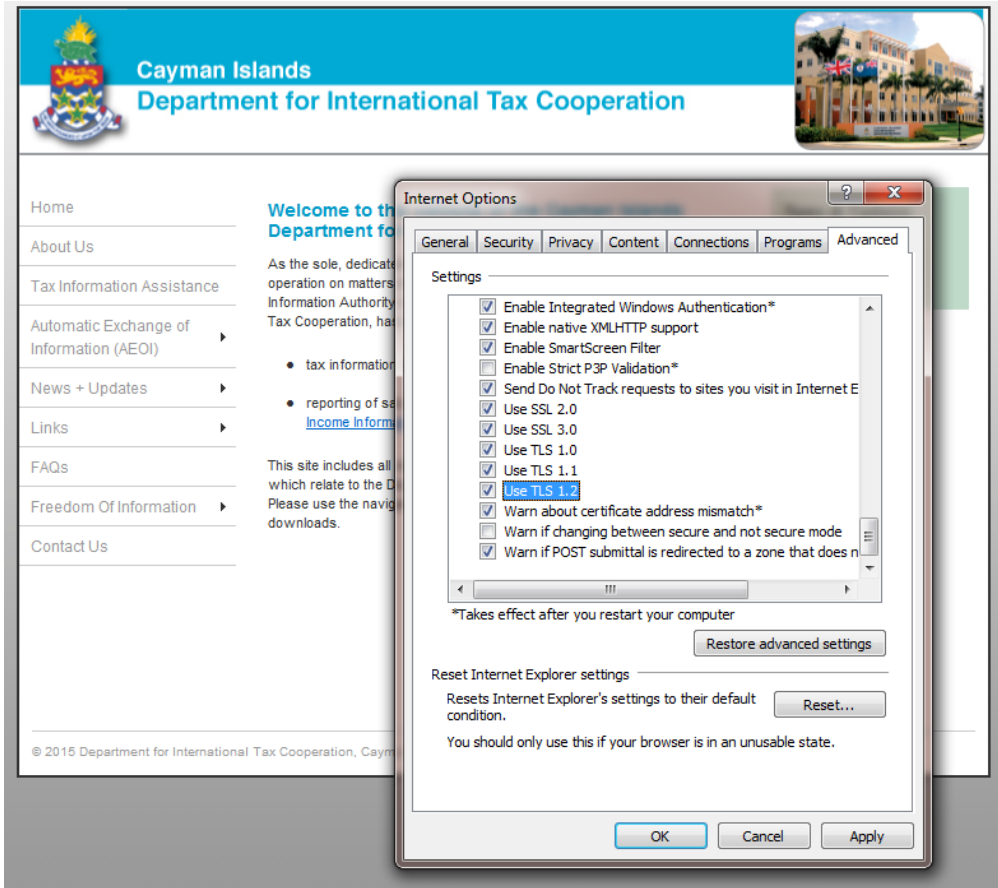

The scope of this document is based on US FATCA only (with the exception of the Notification Form which covers notification of both US and UK FATCA reporting obligations), though most of the portal functionality is expected to remain the same for UK FATCA.

The 'how-to' guidance in this document is not intended to cover the full range of screens and functionality within the AEOI Portal, but provides a high-level overview of the most commonly used functions that financial institutions should expect to use as part of their normal Notification and Report submission procedures.

Web Browser Compatibility

The Cayman Islands AEOI Portal requires the use of TLS1.2.

If difficulty is experienced opening the AEOI Portal this may be overcome by updating the security options of the web browser to allow the use of TLS1.2. The example below shows how to do this using Internet Explorer.

Open the Internet Options (Advanced tab) in the web browser then check the “Use TLS1.0”, “Use TLS1.1” and “Use TLS1.2” boxes under the “Security” heading.

Should problems still be experienced then it is recommended to use a newer version of the web browser. The list below shows a current list of compatible browser versions that may be used without the need to update security settings.

Chrome 40 / OS X
Safari 8 / iOS 8.1.2
Safari 8 / OS X 10.10
Firefox 31.3.0 ESR / Win 7
Firefox 35 / OS X
IE 11 / Win 7
IE 11 / Win 8.1
Safari 6 / iOS 6.0.1
Safari 7 / iOS 7.1
Safari 7 / OS X 10.9

- **Important note:** According to the evolution of standards and in response to newly discovered security vulnerabilities the DITC may change which TLS protocol versions and encryption ciphers are utilised without any prior notice.

Under Cayman law, financial institutions are required to report prescribed information to the Cayman Islands Competent Authority on an annual basis. These AEOI mechanisms include reporting for US FATCA, for similar arrangements with the United Kingdom and for the OECD Common Reporting Standard (CRS).
